

IRENE MARIYAM PRINCE

Senior Full-Stack Engineer

Dubai,UAE | +971529464769 | irenemariyamprince@gmail.com | linkedin.com/in/irenemariyamprince
github.com/IreneMariyamPrince | irenemariyamprince.github.io

SUMMARY

Highly accomplished and security-focused Senior Full-Stack Engineer with 4+ years of experience architecting high-performance web applications, enterprise SaaS platforms, and multi-tenant architectures. Proven track record of leading technical execution, designing scalable frontend systems using TypeScript, and enforcing engineering excellence. Adept at leveraging advanced AI-native engineering environments (Cursor AI) to accelerate delivery speed while maintaining rigorous code quality and security standards. Strong technical leader experienced in mentoring engineers, driving CI/CD automation, and collaborating across cross-functional teams to deliver production-grade software.

TECHNICAL SKILLS

Architecture & Design: Frontend Architecture, Multi-Tenant SaaS Design, State Management, Secure-by-Design Engineering, Performance Optimization.

Languages & Frameworks: TypeScript, JavaScript, Angular (Core Concepts & Component Architecture), React.js, Vue.js, Nest.js, Node.js, Express.js.

Databases & Infrastructure: MongoDB, RESTful & Web3 APIs, Git, CI/CD Pipelines, Monorepo Management (Nx concepts).

AI & Modern Workflows: Cursor AI, AI-Assisted Engineering/Testing Workflows, Agile/Scrum.

Leadership: Technical Leadership, Mentorship & Code Reviews, Cross-Functional Collaboration, Engineering Standards Definition.

PROFESSIONAL EXPERIENCE

Web Developer | PositiveZone Business Services

October 2024 - Present (Dubai, UAE)

- **Technical Execution & Architecture:** Spearheaded the technical architecture and development of a high-security, multi-tenant White-Label Corporate Finance and Invoicing SaaS platform utilizing TypeScript, handling complex financial processing APIs.
- **Security & Reliability:** Implemented secure-by-design practices for handling sensitive corporate financial data, establishing strict input validation, data isolation, and robust error-handling mechanisms.
- **Engineering Excellence:** Championed the adoption of AI-native engineering tools (Cursor AI), driving a significant increase in development velocity while establishing rigorous code review and quality control guardrails.
- **Frontend Performance:** Designed and optimized scalable frontend structures, implementing complex reusable UI components (including advanced functional navigation, lazy-loading, and responsive bullet indicators) ensuring high accessibility and smooth user journeys.
- **Mentorship & Standards:** Defined team-wide engineering standards for code quality, testing, and documentation; mentored junior and mid-level engineers through detailed code reviews and technical guidance.

Software Engineer | OrisysIndia Consultancy Services Pvt. Ltd.

July 2023 – August 2024 (Kerala, India)

- **System Integration:** Built and maintained complex production web applications using TypeScript and modern frontend frameworks, ensuring seamless integration with high-throughput backend services and APIs.
- **State Management & Performance:** Structured large-scale frontend applications with a focus on robust state management, minimizing re-renders, and optimizing application load times for performance-sensitive areas.
- **CI/CD & Automation:** Integrated automated workflows within Git and CI/CD pipelines, reducing deployment friction and ensuring rigorous testing automation before production releases.

- **Cross-Functional Collaboration:** Partnered closely with Product Owners, UX/UI Designers, and QA teams to translate complex business logic into intuitive, scalable end-user features.

Junior Software Engineer | OrisysIndia Consultancy Services

June 2022 – June 2023 (Kerala, India)

- Developed responsive, user-centric web applications using the MERN stack (MongoDB, Express, React, Node.js), focusing on clean code, maintainability, and cross-browser compatibility.
- Collaborated on the migration of legacy codebases into modern TypeScript environments, improving type safety and reducing production bugs.

PROJECTS

White-Label Corporate Finance & Invoicing SaaS

Next.js, React.js, Tailwind CSS, MongoDB, Node.js, Docker Concepts

- Architected data-heavy, client-facing analytics dashboards to monitor live transactional workflows and automated billing states.
- Designed backend pipelines using MongoDB and Node.js for efficient transactional logging and high-volume event processing.
- Containerized core environment steps to ensure frictionless local setup and uniform deployment consistency.

Real Estate Platform & Enterprise CRM Integration

React.js, Tailwind CSS, Redux Toolkit, RESTful APIs, Node.js

- Owned the technical deployment of a property discovery portal featuring advanced multi-criteria filtering engines and asynchronous search fields.
- Engineered foundational API gateway integrations to instantly synchronize data workflows with third-party enterprise CRM systems.

Automated Multi-Site Job Portal & Aggregator System

React.js, Node.js, Python, Axios, AI Tools & Prompts

- Developed a scalable portal supporting automated candidate tracking pipelines and enterprise control panels.
- Utilized AI coding assistants and prompt engineering to design and accelerate the integration of background data-parsing modules.
- Optimized high-volume listing API aggregation layers to ensure real-time engine execution without platform degradation.

Enterprise Document Lifecycle & Proposal Automation Engine

Vue.js, React.js, Node.js, Express.js

- Built an interactive document creation builder featuring modular frontend states, preventing interface shifts during real-time rendering.
- Implemented strict data encryption standards and secure authentication layers to protect sensitive contract execution modules in transit.

EDUCATION

Master of Computer Applications

April 2020 - March 2022

Kristu Jyoti College of Management and Technology, MG University (Kottayam, Kerala)

Bachelor of Computer Applications

August 2017 - March 2020

Kristu Jyoti College of Management and Technology, MG University (Kottayam, Kerala)
